

PARNEET KAUR SANDHU

parneetsandhu20003@gmail.com | 77174-77651 | Bathinda, Punjab | [Github](#) | [LinkedIn](#)

EDUCATION

Maharaja Ranjit Singh Punjab Technical University, Bathinda

Bachelors of Technology in Computer Science and Engineering

Aug 2021 – Jun 2025

CGPA: 7.93

Relevant Coursework: Data Structures and Algorithms, Machine Learning, Database Management Systems, Data Mining, Operating Systems, Artificial Intelligence, Soft Computing, Object Oriented Programming, Theory of Computation, Computer Networks

Central University of Punjab, Bathinda

Masters of Technology in Computer Science and Engineering (Cyber Security)

Aug 2025 – Jun 2027

TECHNICAL SKILLS

Programming Languages: Python, Java, C++, C, SQL, Matlab, JavaScript

Tools: Jupyter Notebook, VS Code, Git/Github, Docker, Optuna, Colab, Kaggle

Frameworks and Libraries: TensorFlow, Transformers, Scikit, Pandas, PyTorch, Spacy, Matplotlib, Seaborn, OpenCV, BERT

Web Technologies: HTML, CSS, JavaScript, Django, Flask, REST APIs, Node.js

Data Science: Web Scraping, Model Training, Machine Learning, Data Cleaning, Data Analysis, Data Visualization, Natural Language Processing (NLP), Geospatial Analysis, Deep Learning, Large Language Models, Computer Vision

WORK EXPERIENCE

Cardekho Group, Gurugram

AI Engineering Intern

Jan 2025 – Jul 2025

- Engineered and fine-tuned 10+ conversational AI features using OpenAI APIs for production-grade chatbot interactions
- Integrated Function Calling, streaming, and TTS/STT modules, enhancing response generation and speech interactivity by 60%
- Implemented a document-based chatbot using RAG with DeepSeek API, achieving ~90% accuracy in context-based responses while reducing token cost by ~40%
- Performed LLM token efficiency and cost-performance analysis across GPT-4o, GPT-3.5, and DeepSeek; documented findings for model optimization strategy
- Created 6+ backend API endpoints for real-time lead generation, data capture, and seamless AI-chatbot communication
- Enabled multilingual chatbot response support, delivering smooth interactions in Hindi (Roman & Devanagari) and English
- Engineered automated alert system using Node.js, triggering email notifications upon API quota breach, improving reliability by 95%

Dosh.ai, New Delhi

Data Science Intern

Jun 2024 – Jul 2024

- Web Scraped and preprocessed over 10,000 data points using BeautifulSoup, ensured a 95% data quality for analysis.
- Developed predictive models with 90% accuracy by implementing machine learning algorithms and optimizing hyperparameters using Optuna.
- Applied NLP techniques with Spacy for a multi-class classification project, achieving 85% accuracy in predicting labels.
- Collaborated with a team of 5 to implement and fine-tune machine learning models, contributing to a 20% improvement in overall prediction accuracy.
- Presented weekly progress reports to senior management, effectively communicating technical concepts to non-technical stakeholders.

Technopedia Solutions Pvt Ltd, Bathinda

Python Developer, Intern

Jun 2023 – Jul 2023

- Automated data processing and analysis tasks, reducing manual workload by 30% with efficient Python scripts.
- Conceptualized and executed new web application features such as Flask/Django, Boosting user engagement by 15%.
- Executed python projects using MySQL for backend data management; facilitating the handling of over 500,000 data records.

PROJECTS

De-Extinct AI

May 2025

- Designed a genetic feasibility tool using BLAST alignment and AI thresholds to evaluate the revival potential of extinct species. Deployed with Streamlit, Biopython, and Plotly..

Diagno-AI | [Github](#)

Mar 2025

- Engineered a 4-in-1 disease prediction app (Parkinson's, Lung Cancer, Heart Disease, Diabetes) using Streamlit and pre-trained ML models with 90+ accuracy; boosted user engagement by 60% with dynamic UI & multi-condition logic.

Virtual Try-On | [Github](#)

Nov 2024

- Established a virtual try-on app using MediaPipe, OpenCV, and Tkinter/ kivy allowing users to try on accessories in real time and achieving a 92% satisfaction rate in user tests.

FarmTech | [Github](#)

Apr 2024

- Generated a machine learning model to predict the most suitable crop with 90% accuracy, based on 7 key environmental factors. Deployed the model as a web application.

- Built an OPD system using Python and MySQL, enabling structured outpatient data tracking. Designed and implemented an OPD system to facilitate the management of outpatient department reducing administrative workload by 30%.
